How to Make the Most of WorkForce 2012

Source: Pamela S. Joell www.jobweb.com

You probably know that career fairs can be a great place for you to meet potential employers. But did you know that you need to do more than print 30 copies of your resume, practice your handshake, and press your interview suit to succeed at these events...

- **Before printing multiple copies of your resume, have others proofread it for typos.** Recruiters hate those! We'll question your work ethic if you hand in a poorly written resume filled with mistakes. Also, don't use "creative" fonts or cram all your numerous awards and association memberships in a type size that is too small for the naked eye. Remember, substance is the key. Your job at this point is to get through our first round of screening. For that, you need a solid, well-written resume.
- **Stay away from creative, euphemistic phrases.** Resist the temptation to stray from the normal, scannable resume format. A resume I received for a sales position stated that the person's job (with a fast-food chain) was to "upsell" customers. I keep thinking to this day, "do you wanna supersize it?"
- **Take time before the career fair to find out which companies will be represented there.** At a minimum, read the career fair handout in advance of attending. You should know something about the participating companies before you approach recruiters. Nothing ticks me off more than a student who approaches me at the table and says, "So, tell me about your company..." I don't mind telling you about my company or about the job opportunities that are available, but I do mind having to do all the work. Worse, I'll think you're lazy if you haven't taken the time to learn something about the company.
- **Have a game plan and focus on no more than three companies you are truly interested in.** Again, it's important to do a little advance research so that you can make an intelligent comment about the company you are approaching. Try something like, "I understand that company SYZ is interested in opening a branch in ABC. Do you think that will expand its overall product mix?" When you engage a recruiter in intelligent dialogue, you stand out. You have limited time at the career fair, so use it wisely. Gather all the giveaways and competitive literature first, enter the sweepstakes, and then focus on the companies you've chosen.
- **Prepare a two-to-three-line script for yourself.** This part is tricky. You should try to impress recruiters within the first few minutes of conversation. The problem is that others will also be trying to talk with those recruiters. If you talk too long, you'll create a bottleneck in the flow of traffic. If you see disgruntled fellow students behind you waiting to introduce themselves to the recruiters, move on. This is not an interview. You can impress employers at other times. Maintain good eye contact and offer a firm handshake and a few sentences telling us what we want to know. That's the formula that works.
- **Tell the recruiter your name, your class year, and whether you're interested in a full-time, co-op, or internship position.** Follow with your career interest, your major(s), and finally, why you came to the company's table. It's okay to flatter the recruiter, but be careful to be professional and keep the flattery focused on the company. For example, you can say, "I heard that XYZ is pursuing a business strategy that includes merging business units to create more synergy. I think that is a really strategic move."
- **Don't ask the recruiter personal questions.** Such questions sound frivolous.
- **Don't skirt the GPA issue.** If you're asked, tell the recruiter your cumulative and/or semester GPA. If you aren't sure, say what you think it is. If our GPA is not stellar, it may not matter, but you need to let us know what we're working with. Nothing is worse than asking us to listen to your reasoning about how your GPA is such and such but if you factor in the wind change in the month of December, your GPA is really at a higher level.
- **When you give a recruiter your resume, ask what the next step is in the process.** Recruiters worth their weight will be able to tell you.

Selling Your Liberal Arts Major

Employers are seeking critical thinkers, problem solvers, effective communicators, and people who have demonstrated that they can work well with others. These are important skills often associated with liberal arts graduates. No matter what your major, you can be competitive if you can reflect your grasp of these skills in your communication with employers. Here are some tips for success:

Craft your resume to emphasize your skills and experience rather than your major. Don't hide your major, but through your description of part-time jobs, internships, and involvement outside the classroom, take credit for what you have done and know how to do!

Develop a strong objective statement that defines the type of positions for which you want to be considered. This indicates that you have given thought to what you want to do and takes the emphasis off your major.

Include a skills summary on your resume in which you target those abilities which relate to the type of jobs you are seeking. Always include computer-related skills, especially those that will be important in the type of job you are seeking.

Wherever possible, describe what you have done in the jargon of the field you hope to enter. Be careful not to overdo this, but it is especially important for a person with a "nonrelated" major to demonstrate some familiarity with the field.

Don't write your resume in terms of what you want or "require" of an employer/position, but rather in terms of what you can bring to that employer in the position you desire.

Use your cover letter to emphasize your knowledge of what you can bring to this particular organization. Briefly describe related experiences. Remember, it doesn't matter where you gained the background (in a job, volunteer experience, campus organization, or hobby)—the end result is what is important.

In interviews or conversations with employers, be prepared to talk about the type of position that interests you and the skills you will bring to that type of position. Be positive about your major and why you chose it, but focus on your skills and experience as a total "package" of what you can bring to the job.

See Yourself Here. As the second-largest general merchandise retailer, Target is an upscale discounter focusing on trend-right merchandise and everyday basics at affordable prices. Great design, innovative products, friendly in-store experiences, and community partnerships put us high above the rest.

Headquartered in Minneapolis, Minnesota, the Target Corporation alone employs over 300,000 team members across the country and even the world. We've grown from 17 stores in 1969 to over 1400 stores in 47 states today. In 2006, the Target Corporation hit over \$50 billion in annual revenue. And that's only the beginning for us.

Our team members bring more than their great energy to work every day. They bring their unique perspectives, experiences and differences to work, too. They give us the strength to dare ourselves to be the best and the power to achieve it.

Beyond our stores, Target is also a well-respected and recognized leader in your community. Target donates over \$3 million each week, and thousands of volunteer hours each year, to nonprofit organizations that directly benefit your community. It's just another way Target is quickly becoming the best company ever.

BizLab exists as a testament to leadership. In fact, BizLab thrives because of leadership. The company is made up of several unique businesses, which are in turn made up of talented, top notch individuals. These individuals are the foundation of BizLab. Some have labeled us as an internet holding company. We, however, prefer "incubator," since it encompasses the care and commitment we put into starting and acquiring and then growing small internet based businesses. We have a simple business model, and it works: take these ethically sound businesses and combine them with dynamic, morally sound individuals to nurture them and bring them to life.

In today's challenging business climate, market leaders recognize that fuel represents a significant cost of moving products to market. We believe that effective fuel management is one of the greatest opportunities for companies to strengthen their supply chain and competitive market position. In fact, since our founding in 2004 we have helped our shipper customers achieve more than \$175 million in fuel cost savings. How do we do this? We work with shippers nationally to transform their approach to fuel management through a customized, collaborative strategic process. From energy sourcing to disposal, we become a trusted advisor and hands-on fuel management partner providing key support throughout the entire transportation energy lifecycle. Breakthrough®Fuel challenges the conventional wisdom applying the knowledge, tools and solutions to help customers think about fuel management differently and takes a problem-solving approach to achieve meaningful business results.

Established in 1953, J. J. Keller & Associates first opened its doors as a one-man consulting shop. Co-founders John J. "Jack" and Ethel Keller saw an unmet need ... to provide motor carriers with the products and services they required to run day-to-day operations. And so began his venture ... a regulatory/consulting/warehousing/insurance underwriting operation. With a steadily growing number of associates, the company began to focus on transportation regulatory services, and built a solid reputation for providing companies with practical help in meeting complex government regulations. Today, after more than 53 years in the business, J. J. Keller is a world-class publishing, printing, and service organization that's grown to over 1,100 associates and serves more than 300,000 customers throughout the United States and Canada. We're still assisting transporters, but we also provide safety and compliance solutions to a growing number of industries - manufacturing, environmental, distribution, chemical processing, construction, food safety, human resources, mining, and more!

Built on an advanced Service Oriented Architecture (SOA) developed over the past 15 years, the RedPrairie integrated E2e™ solutions offer on-demand capabilities to over 32,000 sites worldwide for many of the world's largest companies. RedPrairie's E2e™ solutions synchronize people and products throughout the customer buying cycle to ensure goods reach the right place at the right time. At the point of sale, this means consumers have access to desired products and that the store is staffed with the right people to help them make their purchases. In the production cycle, it means suppliers and manufacturers time and synchronize shipments and production based on demand signals from the retailer. And in the back room of the store, it means having the least amount of inventory, solving the "last yard" problem of the retail supply chain.

Uline - The Shipping Supply Specialists. It's not something we do, it's something we are. An industry leader in the sale of shipping supplies, Uline is experiencing tremendous growth. In business for over 30 years, we've grown into a 507-page catalog and over 20,000 products. In 1980, after recognizing a local need for a shipping supply distributor, Liz and Dick Uihlein started Uline from their basement. Their first product was the H-101 carton sizer (still offered today). It sold far beyond their expectations and encouraged the Uihleins to add more products to the catalog the following year. Our success is a result of our vision. We are dedicated to delivering the highest level of quality and service in the industry. To carry out this vision, we need bright, energetic employees. We offer top pay, great benefits, and an opportunity to grow in a progressive and successful workplace. Uline is dedicated to developing the business and the talents of its employees. Come grow with us!
